

UI Design Concept

Design Philosophy: Designing

The Ariat Insider platform adopts a user centered design philosophy that emphasizes functionality, familiarity, and personalization.

Design Guidelines

To maintain a good navigation and visibility during shopping I used a bottom bar that includes the key sections: Home, Shop, Cart, and You. This ensures users can easily move through the platform without losing their place.

Visuals

We used images from the Ariat gallery that reflect warm, aspirational lifestyles such as memorable ceremonies, and workwear. These visuals help establish an emotional connection with the user by portraying relatable moments and practical fashion.

Typography

Used Source Serif Pro for a strong, elegant, and highly readable typeface that balances tradition and modernity. Its serif structure evokes a sense of heritage and craftsmanship, making it an excellent choice for Ariat. The bold weight enhances visibility and impact, ensuring the logo maintains a commanding presence across various digital and print applications.

Color

Ariat Deep earthy brown or dark color evokes durability and rustic identity. The White/Light Gray for backgrounds to maintain a clean feel and Ariat gold for Diamond members to create a sense of exclusivity.
